

Communication for COVID-19 CE impact – 3/20 update

Biolase takes the health and wellbeing of its customers and employees seriously. Our leadership Team is meeting daily to discuss changing conditions and any updated recommendations from the U.S. Centers for Disease Control (CDC) and relevant state and local authorities.

As a trusted education partner we are keenly aware of our duty to take all health and precautionary issues into consideration. Therefore, **all hands-on / participation courses currently on the CE schedule through April 17th, 2020 have been cancelled.**

However, many of those previously scheduled courses have been repurposed into a web-based format and we are pleased to announce an online continuum featuring interactive presentations from notable clinical and practice management leaders. These informative and engaging presentations will take place on Wednesday and Friday of each week for the next four weeks, beginning March 25th. Please go to www.biolase.com or www.wcli.org for more information.

COVID-19 is creating unique conditions for individuals and businesses alike. However, we believe that with common sense and sound judgment, we can optimize safety and continue to serve the needs of the dental community at large.
